

May 18 / Administration of George W. Bush, 2001

Kosovo, including through the recent promulgation of the Constitutional Framework for Provisional Self Government and preparations for Kosovo-wide elections. The KFOR coordinates with and supports UNMIK at most levels, and is represented at the Kosovo Transitional Council and the Joint Civil Commissions. Also, KFOR support includes providing a security presence in towns, villages, and the countryside, and organizing checkpoints and patrols in key areas of Kosovo to provide security, protect minorities, resolve disputes, and help instill in the community a feeling of confidence. Finally, KFOR is supporting, within its means and capabilities, the provision of humanitarian relief, public safety and order, and the maintenance of essential civic works resources.

NATO continues formally to review KFOR's mission at 6-month intervals. The conclusions reached as a result of the ongoing 6-month review, which is scheduled to be completed by late May, will be presented to the NATO foreign and defense

ministers' meeting, which will be held in late May and early June. These reviews provide a basis for assessing current force levels, future requirements, force structure, force reductions, and the eventual withdrawal of KFOR. The KFOR has transferred responsibility for its public safety and policing responsibilities to the UNMIK international and local police forces in every area except Kosovska Mitrovica and Pec.

The continued deployment of U.S. forces has been undertaken pursuant to my constitutional authority to conduct U.S. foreign relations and as Commander in Chief and Chief Executive. I appreciate the continued support of the Congress in these actions.

Sincerely,

GEORGE W. BUSH

NOTE: Identical letters were sent to J. Dennis Hastert, Speaker of the House of Representatives, and Strom Thurmond, President pro tempore of the Senate.

The President's Radio Address *May 19, 2001*

Good morning. This week I outlined a new energy strategy for our Nation—more than 100 specific recommendations to promote energy conservation, enlarge and diversify our energy supply, and modernize the networks that link energy producers to energy consumers.

We need to act to protect family budgets. Since 1998, the energy bill of the average family has skyrocketed by 25 percent. That's a hardship for every family. We need to act to prevent more and more widespread blackouts. Blackouts disrupt businesses and put public health and safety at risk. We need to act to reduce our reliance on foreign crude oil. And if we fail to act, our environment will suffer as Government

officials struggle to prevent blackouts in the only way possible, by calling on more polluting emergency backup generators and by running less efficient old powerplants too long and too hard. So we will act to protect our economy and to safeguard our environment.

Too often Americans are asked to take sides between energy production and environmental protection. The truth is, energy production and environmental protection are not competing priorities. Both can be achieved with new technology and a new vision.

Most of the new electric powerplants we build over the next 20 years will be fueled by clean and safe natural gas. Many of the

others will be powered by wind, solar, hydropower, nuclear, and other energy sources that emit no pollution at all. New cars emit 95 percent less pollution than cars built 30 years ago. And my energy plan fosters the development of a new generation of cars that is even cleaner still.

Wise regulation and American innovation will make this country the world's leader in energy efficiency and conservation in the 21st century. We will use less and less additional energy to fuel more and more economic growth. Yet, even as we grow more efficient, we will always require some additional energy to power our expanding economy.

Advanced new technologies allow entrepreneurs to find oil and to extract it in ways that leave nature undisturbed. Where oil is found underneath sensitive landscapes, rigs can now stand miles away from the oilfield and tap the reservoir at an angle. In Arctic sites, like ANWR, we can build roads on ice that literally melt away when summer comes and the drilling stops to protect wildlife.

I was just in Pennsylvania and paid a visit to the Susquehanna River. After years

of being endangered, American shad have been restored to this great waterway, and the fish are thriving alongside the dam that is generating emission-free hydroelectric power to meet the needs of Pennsylvania's people.

It's time to leave behind rancorous old arguments and build a positive new consensus. With new technology, sound regulation, and plain good sense, we can expand our energy production while protecting the environment. And that is exactly what my energy approach is designed to do.

Thank you for listening.

NOTE: The address was recorded at 5:20 p.m. on May 18 in the Cabinet Room at the White House for broadcast at 10:06 a.m. on May 19. In his address, the President referred to ANWR, the Arctic National Wildlife Refuge. The transcript was made available by the Office of the Press Secretary on May 18 but was embargoed for release until the broadcast. The Office of the Press Secretary also released a Spanish language transcript of the address.

Commencement Address at the University of Notre Dame in Notre Dame, Indiana

May 20, 2001

Thank you, Father Malloy. Thank you all for that warm welcome. Chairman McCartan, Father Scully, Dr. Hatch, Notre Dame trustees, members of the class of 2001. It is a high privilege to receive this degree. I'm particularly pleased that it bears the great name of Notre Dame. My brother Jeb may be the Catholic in the family—[*laughter*]—but between us, I'm the only Domer. [*Laughter*]

I have spoken on this campus before. It was in 1980, the year my dad ran for Vice President with Ronald Reagan. I think

I really won over the crowd that day. [*Laughter*] In fact, I'm sure of it, because all six of them walked me to my car. [*Laughter*]

That was back when Father Hesburgh was the president of this university, during a tenure that in many ways defined the reputation and values of Notre Dame. It's a real honor to be with Father Hesburgh and with Father Joyce. Between them, these two good priests have given nearly a century of service to Notre Dame. I'm told that Father Hesburgh now holds 146
